in /in/chamod-gamage

Chamod-gamage

SKILLS

JavaScript, TypeScript, HTML, CSS, Python, Java, C++, React.js, Node.js, GraphQL, Flask, MongoDB, SQL, Git, Docker, Azure, GCP, AWS, Kubernetes, Firebase

EXPERIENCE

Full Stack Developer

LCBOnext % 🛗 May 2021 - Aug 2021

- Built the Grocery Claims web application using React (TS), Node.js, TypeORM, PostgreSQL, enabling coordination of potential refunds and returns on >\$300M worth of goods
- Managed developer team processes by creating Notion documentation + task board, and Azure CI/CD pipelines
- Revamped pricing data pipeline with Tesseract OCR, a combined ElasticSearch & SQL product database, and a Flask server deployed on Kubernetes, enabling real-time price updates to in-store LCD tags with 400% less latency

• Built socially impactful full-stack technical solutions for The Pregnancy Centre & & HeadsUpGuys & () (donation hub and no-code interactive module builder respectively)

Software Developer

FutureFit Al % 🛗 Aug 2020 - Jan 2021

- Developed career coaching platform end-to-end with React (+Redux), Node.js, & PostgreSQL for CCYP (NPO), enabling personalized coaching for thousands of youth
- Refactored flagship product to meet **WCAG** standards
- Developed the central hub of a career guidance platform to be in the hands of 10000+ users globally in 2021 and was instrumental in attracting customers such as RBC %

Full Stack Developer → DevOps Developer Honeybee Hub Inc. \$\&\exists \exists Jan 2020 - Aug 2020

- Developed key features for a digital marketplace startup with 1500% active user growth, now 5000+
- Orchestrated secure **Kubernetes** networking in-house for HIPAA compliant data management, saving **\$1000/month**
- Redeveloped landing page using React.js, HTML, & CSS to improve SEO and retention, reducing bounce rate 80% %
- Acted on user feedback by conceiving, designing, and implementing a scheduled messaging feature for researchers using MongoDB, Node.js, and React.js, saving user time %

PROJECTS

PC Donation Hub | MERN, GraphQL % 🗘

- Architected + built a central donation hub for The Pregnancy Centre as a developer on UW Blueprint to aid families in need
- Owned authentication & asset hosting, using Node.is (TS) backend + Firebase
- Built frontend (React) dashboards allowing staff to create and edit donation requests
- Stored & served requests with MongoDB and GraphQL APIs (Apollo + Express)

Stocksimple | React, Node, MongoDB % 🗘

- Developed SPA + API using React, Node.js,
 & MongoDB to track stock portfolio
 (deployed on Netlify and Heroku)
- Utilized Tradier API to stream market data
- Implemented custom **JWT** authentication

Employee Management System | Java 🗘

- Constructed Java Swing desktop app to manage employees using OOP principles for efficient data management
- Enabled CRUD operations and search functionality for thousands of employees stored in a self-implemented hash table

ACHIEVEMENTS

- University of Waterloo Dean's List (x3):
 Ranked #2 in Systems Design Engineering
- 2018 FRC World Championship Semifinalist, STEMley Cup Champion
- Top 5% on Fermat Mathematics Contest
- HooHacks 2020 Honourable Mention

EDUCATION

BASc, Systems Design Engineering
University of Waterloo - 3.98 GPA (93%)
2019 - 2024

Relevant Courses:

Data Structures & Algorithms - 96%, Digital Systems - 100%

Interests: Rollercoasters, Puzzles, NBA, Piano
